Hemo bioscience and the American Red Cross are pleased to offer control cells for antiglobulin testing.

The Indirect and Direct Antiglobulin Tests are important assays in the clinical laboratory. An essential component of each test is the Control Cells, group O human red blood cells sensitized with human IgG. The American Red Cross Diagnostic Manufacturing Division has received FDA 510(k) clearance to manufacture these cells and Hemo bioscience is the exclusive distributor.

Ensuring your reagents are working effectively is one of the most crucial aspects of blood bank operation. A rigorous QC program ensures your laboratory is in compliance with regulatory and accreditation agencies. Hemo bioscience is pleased to offer the DailyChek QC Kit and IgG control cells manufactured by the American Red Cross Diagnostic Manufacturing Division. The DailyChek QC Kit is used in quality control of blood bank reagent red blood cells. IgG control cells are used to confirm the efficacy of Anti-Human Globulin in the direct or indirect AHG test they provide strong reactions while still detecting partial neutralization. They provide strong reactions while still detecting partial neutralization.

**FEATURES & BENEFITS**

- Consistent approach to quality control
- Qualifies reverse typing cells for use in antisera QC
- Perform QC on reagent red cells, AHG, and potentiators
- Same reagent for reverse typing cells and screening cells
- 2-year expiry from date of manufacture
HEMO BIOSCIENCE COMMITMENT TO SERVICE

CUSTOMER SERVICE

Hemo bioscience offers you flexible ordering options by fax, phone or email. To assist you in inventory management, we can set up standing orders or blanket orders. Most products are available for immediate overnight shipping. We develop, manufacture and inventory products in our facility, located in the heart of Research Triangle Park, North Carolina.

TECHNICAL SUPPORT

Hemo bioscience technical support is staffed by professional, qualified technologists who have donor center, immunohematology reference laboratory and transfusion laboratory experience; we understand your challenges in the laboratory. We have two fully operational immunohematology laboratories on site with qualified staff who can resolve product questions and guide you in deciding which products fit your needs.

QUALITY POLICY

Hemo bioscience strives to provide our customers with products and customer service that meet or exceed their expectations. We have established a comprehensive Quality Management System which provides a framework for measuring and improving our performance based on FDA CFR 21 part 820 standards, and we are ISO 13485 accredited. We have systems and procedures in place to support us in our goal of ensuring our customer requirements are met.
